

WEEK 1 - Wellbeing Activities to Try

Try a wellbeing activity each day. Many of these are evidenced based to improve wellbeing although you might need to do them more than once a week to feel the benefit. Approach them with a curious and open mind, but if it does not feel safe for you to try it then don't – try something else. Do you feel any different after doing the activity? Is it something you can do again? Is it something to recommend to a friend or family member? We have tried to make sure these don't all require Internet or lots of resources. If you don't have access to what you need, try and modify the activity or try a different one.

Most importantly if you are really struggling with your wellbeing every day then ask for some help. Contact your school or go through these websites for extra help.
