

Count in 10s

Problem solving and reasoning cards:

There are 4 apples on each tree.

There are 10 trees.

There are 40 apples altogether.

True or false?

Explain your answer.

Ben says,

I am counting in tens to 50. The digit in the tens column is the same as the number of tens in that number.

Is Ben correct?

Explain your answer and provide an example.

Dom is counting in 10s.

He starts at 10.

Use a number line to help you find:

What is the 3rd number?

What is the 5th number?

What is the 8th number?

What is the 7th number?

What is the 9th number?

Colour the mistakes on the number track.

Explain the mistakes.

Draw the number track in the correct order.

Draw a number line to show counting in tens from:

10 to 50

60 to 100

I want to buy 50 grapes. Are there enough?

Explain your answer.

Count in 10s

Problem solving and reasoning cards:

There are 4 apples on each tree.

There are 10 trees.

There are 40 apples altogether.

True or false?

Explain your answer.

False.

There are 10 apples on each tree. There are 4 trees.

Ben says,

I am counting in tens to 50. The digit in the tens column is the same as the number of tens in that number.

Is Ben correct?

Explain your answer and provide an example.

Ben is correct. For example: 2 tens is the same as 20. 4 tens is the same as 40.

Dom is counting in 10s.

He starts at 10.

Use a number line to help you find:

What is the 3rd number? 40

What is the 5th number? 60

What is the 8th number? 90

What is the 7th number? 80

What is the 9th number? 100

Colour the mistakes on the number track.

Explain the mistakes.

The numbers 50 and 60 are in the wrong order.

Draw the number track in the correct order.

Draw a number line to show counting in tens from:

10 to 50

60 to 100

I want to buy 50 grapes. Are there enough?

Explain your answer.

Yes.

There are 6 bunches of 10 grapes = 60. Therefore, there is enough grapes as he needs 50.
